MUSE | Solar Bollard Light

MUSE solar bollard light offers a futuristic design with a five-year warranty for public space outdoor lighting applications where the benefits of IK10 vandal resistance are required. LifePO4 battery combined with an intelligent lighting program provides 100% power up to 280 lm for 4 hours before changing to 30% power of full production to 100% when the PIR sensor is triggered. It ensures up to four nights of lighting on a single full charge of the battery. The mission of MUSE is to comply with the requirement of the Dark Sky Association by limiting the upward light waste ratio (UWLR) to <1%. Limiting upward light reduces environmental light pollution and protects the view of our night sky for all.

We also offer the MUSE Solar bollard light in a wildlife-friendly version retaining all the features of the original product. Wildlife-Friendly lighting is specifically designed to minimise the ecological impact on animals and insects.

AI-GL275R/W Solar Wall Light

Working Mode

AI-GL275R Solar Bollard Light

- 
 36 hours backup with fully charged battery
- 
 LED power is automatically adjusted to save energy
- 
 Dusk to Dawn automatically ON/OFF
- 
 LiFePO4 battery inside more than 10 years lifetime
- 
 Equipped PIR motion sensor to save energy
- 
 High luminous flux output up to 280lm performance
